## MEDICINAL.

### Oh, My Back!

That's a common expres-  
sion and has a world of  
meaning. How much suf-  
fering is summed up in it.

The singular thing about  
it is, that pain in the back  
is occasioned by so many  
things. May be caused by  
kidney disease, liver com-  
plaint, consumption, cold,  
rheumatism, dyspepsia, over-  
work, nervous debility, &c.

Whatever the cause, don't  
neglect it. Something is  
wrong and needs prompt  
attention. No medicine has  
yet been discovered that  
will so quickly and surely  
cure such diseases as  
BROWN'S IRON BITTERS, and  
it does this by commencing  
at the foundation, and mak-  
ing the blood pure and rich.

Logansport, Ind. Dec. 1, 1880.  
For a long time I have been  
suffering from stomach and kidney  
disease. My appetite was very poor  
and the very small amount I did eat  
disagreed with me. I was annoyed  
very much from non-retention of  
urine. I tried many remedies with  
no success, until I used Brown's  
Iron Bitters. Since I used that my  
stomach does not bother me any.  
My appetite is simply immense. My  
kidney trouble is no more, and my  
general health is such that I feel  
like a new man. After the use of  
Brown's Iron Bitters for one month,  
I have gained twenty pounds in  
weight.  
O. E. SARGENT.

Leading physicians and  
clergymen use and recom-  
mend BROWN'S IRON BIT-  
TERS. It has cured others  
suffering as you are, and it  
will cure you.

A Novel Steamship.  
Robert Fryer, of New York, has invented  
a novel steamship, on a principle heretofore  
unheard of, which is a kind of Marine velo-  
ciped on three wheels, her hull not being in-  
tended to touch the water. A model of this  
ship was completed some months ago at a  
ship yard on the Harlem River, near Mc  
Comb's Dam, and has since been sent to  
Hastings-on-the-Hudson, where a large ship  
of the same design, to be called the Oceanic,  
is now building. The singular point of the  
invention is, that the support of the ship—  
the float—as it were, and the propellers are  
one and the same. The vessel floats on  
three spheres, made of sheet steel, one for-  
ward and two astern. Each of these is fitted  
with flanges which surround nearly the  
whole of its circumference, and act as paddles.  
The spheres are so arranged that they can  
be worked backward and forward, or one  
worked backward and the others forward  
simultaneously, so that the vessel may be  
turned completely around in her own water.  
With such a rapid power of turning no ruder  
will be necessary. The interiors of the  
spheres are divided into compartments for  
the purpose of increasing their strength, and  
decreasing their liability of sinking in case  
of accident. They are also proportioned  
that only about one-sixth of their capacity  
is immersed in the water when supporting  
the entire weight of the vessel, serving in  
that way to keep the ship at a sufficient dis-  
tance above the level of the sea to prevent  
the hull being brought into violent contact  
with the water in the roughest weather.  
The spheres are provided with a flanged  
keel to adapt the vessel for use on rails in  
the case of crossing an isthmus, or for be-  
ing run upon land for repairs. The upper  
works of the ship are to depend upon the  
spheres that are to do the propelling, and  
will be as light as consistent with strength.  
Three watertight domes, or wheel houses,  
are arranged upon the framework or bottom  
which serve as state-rooms, cabins,  
etc. The state-rooms are to be in the  
after part of the vessel, behind the  
whole, or the second or third deck. The  
hull is made watertight so that in the event  
of the wheels or spheres being broken or  
disabled, or the vessel capsized, it will still  
possess sufficient buoyancy to prevent it from  
sinking. The vessel is designated only for  
passenger traffic, and it is claimed that its  
peculiar construction gives increased accom-  
modation, greater safety, and a higher rate of  
speed than that now used.

The "Oceanic," now building at Hastings-  
on-the-Hudson, is to be 224 feet long and 130  
feet wide. The spherical wheels are to be  
24 feet in diameter, drawing 5 feet when  
loaded. Recently, the inhabitants of the  
twenty-fourth ward of New York were con-  
siderably astonished upon seeing an extra-  
ordinary looking vehicle with three wheels,  
weighing over two tons, steam its way across  
land from the Harlem River to Spuyten  
Duyvil Creek, near the Hudson River, and  
traveling to the water's edge, not stop, but  
continue on over the surface of the water as  
readily and almost as rapidly as it had  
travelled down hill on land. This was the  
model of the "Oceanic," on its way to Hast-  
ings. The model was easily guided by hand,  
and propelled by its own power. As much  
difference is claimed by its inventor to exist  
between it and an ordinary boat as between  
a wagon mounted on wheels and one that  
should rest on the ground, and be dragged  
along the surface by means of wheels at-  
tached to its sides. Says the *Nautical Gat-  
ette*: "The invention certainly presents  
some intensely interesting problems. If  
successful, it must revolutionize passenger  
traffic by water, as the vessel for a given  
amount of this traffic can be built for what  
the ordinary vessel would cost, and will per-  
form double service. Nothing can be more  
unsinkable than these buoyant globes; noth-  
ing can be stronger or lighter than the  
whole vessel made, as it will be, out of steel,  
and presenting at every point to wind and  
wave the arch. Water is the great road-  
way of the world, and wheels the great  
vehicle. A perfect combination of the two  
perfects transportation.

An exchange utters this mild protest. A  
doctor will sit down and write a prescrip-  
tion; time, five minutes; paper and ink,  
quarter of a cent, and the patient pays \$1,  
\$2, \$5, \$10, as the case may be. A lawyer  
writes ten or twelve lines of advice, and gets  
from \$10 to \$20 from his client. An editor  
writes a half-column puff for a man, pays a  
man from fifty cents to a dollar for putting it  
in type, prints it on several thousand people  
and then surprises the puffed man if he  
makes any charge.

Disease is an effect, not a cause. Its origin is  
within; its manifestations without. Hence, to  
cure the disease the cause must be removed, and in  
no other way can a cure ever be effected. WAR-  
NER'S SAFE KIDNEY AND LIVER CURE is es-  
tablished on just this principle. It realizes that  
95 PER CENT.  
of all diseases arise from deranged kidneys and  
liver, and it strikes at once at the root of the dif-  
ficulty. The elements of which it is composed act  
directly upon these great organs, both as a food  
restorer, and by placing them in a healthy  
condition, drive disease and pain from the system.  
For the innumerable troubles caused by un-  
healthy kidneys, Liver and Urinary Organs; for  
the distressing Disorders of Women; for Malaria,  
and for physical derangements generally, this  
great remedy has no equal. Beware of imposters,  
imitations and concoctions sold to be just as good.
